Project Information Sheet, Batch (2023-2027)

Project Title: Citizen Rights and Government Scheme Navigator

Student Team Members Name and Roll Nos.

- 1.
- 2.
- 3.

Project Guide(Faculty) Name:

1. Category (Identify the project Type of Project Undertaken) - Application, Product, Research, Review

Application-type project: delivers a working citizen-facing search application (hybrid retrieval, grounded generation, and a web interface), with a research component in adapting retrieval-augmented generation techniques to the government scheme domain. Core technology stack: PostgreSQL, pgvector, FastAPI, and React.

2. Explain the following aspects of the project work done

Environmental Impact	Minimal; only standard compute and storage used. Reduces paper-based enquiry at government offices.
Ethical Considerations	Answers are strictly grounded in cited source documents to avoid fabricated eligibility claims.
Cost analysis and feasibility	Built on open-source components (PostgreSQL, pgvector, FastAPI, React); only recurring cost is LLM API usage.
Standards Compliance (If Any)	Uses only publicly available scheme documents; no personal citizen data is stored.

3. Map Project undertaken with SDGs

Title of Project	SDGs	Justification
Citizen Rights and Government Scheme Navigator	SDG 16: Peace, Justice and Strong Institutions	Improves transparent, source-grounded access to public welfare information and reduces information asymmetry between citizens and government institutions.
