

Minor Project Synopsis Format for 7th Semester

- Synopsis, preferably, should be of about 10-15 pages.
- The content should be as brief as is sufficient enough to explain the objective and implementation of the project.
- The document must adhere to the guidelines and should include the following:

1. Title of the Project
2. Problem Statement
3. Why is the particular topic chosen?
4. Objective(s) and scope of the project
5. Methodology
6. Hardware, Software, Technology Stack to be used.
7. What contribution would the project make towards the society?
8. The Schedule of the project (Gantt chart/ PERT chart)
9. If any implementation/prototype is ready then explain further
10. References/Bibliography.

Following contents have to be taken into consideration in synopsis:

Title of the Project: This should be explicitly mentioned at the beginning of the Synopsis. Since the topic itself gives an insight into the project to be taken up, the student is suggested to be reasonable on the name/title of the project. The title being the overall impression on the complete work, the topic should substantiate the work.

Objective and Scope: This should give a clear picture and final outcome of the project. Objectives should be clearly specified. What the project ends up to and in what way it is going to help the end user has to be mentioned.

Process Description: The process of the whole software system proposed, to be developed, should be mentioned in brief. This has to be supported by DFD's/Use Case Diagrams to explain the flow of the data and control in the project.

Resources and Limitations: The requirement of the resources for designing and developing the proposed system must be given. The resources might be in form of the hardware / software or real time data. The limitations of the proposed system in respect of a larger and comprehensive system must be given in the synopsis itself.

Conclusion: The document must end with the concluding remarks-briefly describing innovations in implementing the project and also any other important feature that makes the system stands out from the rest.

References and bibliography: The complete list of books (chapter listing, topic listing), website links (complete URLs) and research papers (title and authors, year of publications) have to be mentioned.

Sample format of References:

Project Information Sheet, Batch (2023-2027)

Project Title:

Student Team Members Name and Roll Nos.

- 1.
- 2.
- 3.

Project Guide(Faculty) Name:

1. **Category (Identify the project Type of Project Undertaken) - Application, Product, Research, Review**

Write a single paragraph with explanation on the justification of categorization.

2. **Explain the following aspects of the project work done**

Environmental Impact	
Ethical Considerations	
Cost analysis and feasibility	
Standards Compliance (If Any)	

3. **Map Project undertaken with SDGs**

Title of Project	SDGs	Justification
